New and enhanced features

Ability to restore PDF/Video/Epub players state

Users can start reading the PDF or viewing the videos from where they left off. This feature also allows users to get back to the same speed, zoom percentage, volume, page number, and a few other features. This feature is implemented for the mobile app only.

[SB-26323](#), [SB-26322](#)

Updates to course assessments and question sets

When taking a course assessment on the portal, users will be able to toggle between full screen and usual screen without losing the current state they are in and can continue taking the assessment without going back to the first question. This feature is implemented for the portal only.

[SB-27410](#)

Click on the LOGO image to be redirected to the Home page

When the user clicks the logo on the top left of any page of the site, they should be taken to the home page of the site.

[SB-27269](#)

Enable the admin to add roles to users from different root organizations as well as their root organization.

The admin should be able to add roles to users from different root organizations as well as their root organization.

[SB-23272](#)

Ability to browse through content created using the interactive editor

Users will browse through content created using the interactive editor, either using a screen reader or keyboard-based navigation.

Enhancements to Epub player

Users will not only be able to traverse forward/backwards on epub content, but they will also be able to jump to pages, move to a particular location, and so on.

[SB-27079](#)

Enhancement of Assessments archival jobs

Data archival is part of the larger strategy to be able to better manage the large amounts of data that can quickly get amassed, and Course data archival is being done in two parts - assessments data archival and progress data archival.

[SB-27410](#)

UI Label change in Program Dashboard

Filter name in Program Dashboard to select the solution will be changed to 'Select Resource' as the term is more familiar and relatable for the Program managers and state admins.

[SB-27435](#)

Minor enhancement in Create Project Page

A minor enhancement is being done on the **Create Project** page to provide descriptions for the information that the user is required to give for creating the project. This will make the process of creating a project easier.

Project and Observation metric in Tabular representation

In release 4.5.0, project and observation metrics will be presented in a tabular format that can be downloaded based on the filters applied for admins to read data easily.

[SB-27101](#)

Converting Epub and PDF players to embeddable

With this feature, adopters will be able to embed the PDF & Epub players into their applications
